The deliverable management interface allows you to prepare all your boards: phasing books or sequential boards.

- **The phasing book** is created using the summary tasks structure of your project. The phasing book allows you to have a Stage / Stage vision of your project. Very often the phases are defined by significant changes in rights-of-way or modifications in traffic patterns (tipping, deviation, alternating...), in other words when the impacts of the work change.
- **Sequential books** are a temporal reading of your project. These boards make it possible to monitor the execution of all or part of the project on regular intervals of time: every hour, every day, every week...

The screenshot displays the Phase Manager software interface. On the left, a vertical toolbar contains icons for home, edit, view, print, and other functions. The main window is divided into several sections:

- Deliverables:** A table with columns 'Name' and 'Order'. It lists 'Programme Hebdo' and 'Phasage', with 'Phasage' highlighted by a green box.
- Task field:** A dropdown menu showing 'Task field' and 'Style par déf...'.
- Page format:** A section with 'Page layout', 'Page size' (set to A3), and 'Orientation' (set to Portrait).
- Map / Drawing:** A large area showing a map of a construction site. A yellow excavator is visible on the map. A calendar for 2020 is overlaid on the map, showing the months of January, February, March, and April. A legend on the left side of the map lists various construction tasks with corresponding color-coded boxes: Assainissement (blue), Travaux préparatoires (orange), Signalisation (yellow), Installation (green), Démolition B & T (red), Pose des bordures (brown), Structure de chaussée (grey), and Enrobés (black).
