

User fields management

Options menu

- [Project and Gantt properties](#)
- [Labels management](#)
- **[User fields management](#)**

Phase Manager 4 allows you to manage custom fields to enrich the characteristics of your activities.

There are three types of fields:

- Text
- Numeric
- Choice list

Note: Custom fields of type “Choice list” now replace the old areas conditions.

⇒ See. [Ajout et modification des styles d'activités](#) to see how to proceed.

Adding, deleting and editing fields

To edit, add or remove custom fields, go to Options > Manage Custom Fields.

In the window that opens, you can:

- 1/ add a field by filling in its name, its type (using the drop-down menu), then by clicking on the button

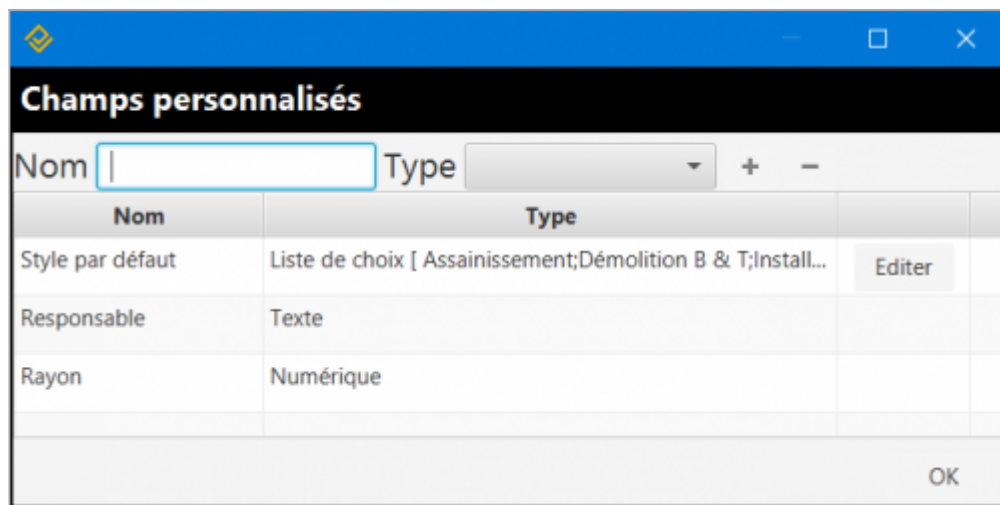

- 2/ delete a field by clicking on it and then on the button

- 3/ modify the entries of a field of type *Choice list*, by selecting it then clicking on the button

Rayon	Numérique

Adding values to activities custom fields

To add or change a custom field value, you can either :

1/ Open the activity detail window and fill in the fields directly:

[PL-003] Démolition Parking

Détail de l'activité Dates Zones Liens

ID PL-003

Nom : Démolition Parking

Phase Phase 00 : Travaux préparation

Champs personnalisés

Style par défaut Travaux préparatoires ▼

Responsable Pierre L

Rayon 240

2/ Import your custom fields from the activity data table: [see: the new import/export interface](#)
